PROFILE

First Customer Success hire at an early-stage B2B Voice AI company, promoted to Head of Growth & Expansion. I own the client journey end to end: discovery, implementation, technical troubleshooting with Product and Engineering, adoption and renewal. I care about the person behind the renewal number, because understanding what is blocking them is usually what improves the number.

EXPERIENCE

Customer Success Specialist → Head of Growth & Expansion

2025 – 2026

Nedzo AI · B2B Voice AI · first Customer Success hire

- Led 10 enterprise implementations from kickoff to go-live and managed those accounts through Slack and monthly reviews, retaining 9 of 10; also supported ~100 self-service customers via Intercom.
- Implemented an AI agent for a real estate client with a developer: ~50% of ~350 monthly contacts handled automatically; when the original data source stopped giving access, proposed an alternative route; the client continued after the 3-month pilot.
- Investigated issues before escalating: reproduced them, reviewed calls and transcripts, and handed them to Product and Engineering in Linear and Slack with a structured ticket.
- Built a customer health view combining nine signals into one status; presented to leadership and approved. A flagged account subsequently renewed.
- Aligned a 10-person construction client on scope and got the agreed Phase 1 approved.
- Promoted to Head of Growth & Expansion: opened the Portuguese market with a LinkedIn outreach system (HeyReach + Claude): ~33% of outreach became meaningful conversations, ~20 meetings in two months.

Account Manager

2024 – 2025

Medinox

- Managed relationships with ~100 pharmacies across ~200 products in Prospect CRM, with proactive check-ins and regular inventory reviews.
- Grew sales to pharmacies by ~20% by spotting products missing from each client's range, based on their inventory and customer demographics; upsold 50% of clients.
- Replaced ad hoc stock tracking with an Excel inventory system across 200+ SKUs that flagged low stock from delivery flow and restock lag times.

Customer Success Manager

2023 – 2024

White Stone Wellness

- Managed scheduling for 6 therapists, confirming 30+ client bookings a day in Mindbody and filling appointment gaps; room utilisation up by as much as 25%.
- Reactivated 50+ inactive clients through personalised outreach and targeted email (Mailchimp) and social campaigns, increasing weekly appointments by 15%.
- Kept client satisfaction above 90% by monitoring and responding to online reviews; handled end-of-day closing, invoicing and health insurance claims.

Project Manager & Community Nutritionist

2020 – 2022

Vitamimos · Centro de Educação Alimentar

- Led 3 government-funded food education programmes reaching 50,000+ children and adults from vulnerable communities across Portugal.
- Managed 20 partnerships with municipal health services and local organisations, and co-supervised 10+ internships.
- Developed 100+ educational materials and campaigns, increasing nutritional literacy and online engagement by over 60%.

EDUCATION

BSc Nutrition Sciences, Egas Moniz · Registered Dietitian
HarvardX CS50's Introduction to Artificial Intelligence with Python (2025)

WHAT PEOPLE SAY

“She took ownership of our customer relationships with professionalism and care.”
Denis Rhomays, Co-Founder & CEO, Nedzo AI

“Patient with people who are frustrated, clear when explaining something technical... she follows through.”
Ivo Schipper, Co-Founder, Nedzo AI

“She went step by step with me to try to get the issue resolved.”
Nedzo customer, Trustpilot
